$t_B = 77$ yr
Human: somatic mutation accumulation (Cagan 2022) vs VBLS Σ(t)
VBLS nonlinearity vs observed linearity | Regression slope: 53 mut/genome/yr | $t_B = 77$ yr
Individual crypts (Cagan 2022)
Individual mean (n=6)
Linear regression: 53 mut/yr ($R^2 = 0.903$)
VBLS Σ(t) (scaled to data)
